iCraft® Deco Foil™ Flock Sheets

Directions using Deco Foil™ Transfer Gel:

Always pre-test for best results.

Directions are based on Royal Sovereign model # CL1223. Other brands/models temperature and speed settings may vary.

1. For best results, spray back of stencil with Pixie Spray™ to hold stencil in place. Apply Deco Foil Transfer Gel across stencil using the Deco Foil Stencil Pal or palette knife, return excess gel to jar. Remove and clean stencil promptly.
2. Let dry 1 hour or until completely clear.
3. Cut a piece of flock slightly larger than design. Place design facedown onto colored side of flock.
4. Place inside folded piece of parchment paper, keeping flock on the bottom.
5. Run through hot laminator twice, leading with the creased edge. Once cool, peel away flock sheet to reveal flocked design.

Tips: For small pieces, place a piece of cardstock underneath for support.
Clean stencil and tools immediately with soap and water or alcohol-based hand sanitizer

Directions using Deco Foil™ Foam Adhesive Sheets:

Always pre-test for best results.

1. Create foam design using scissors, punch, die-cutting machine, or an electronic cutter. Cut a piece of flock slightly larger than the design.
2. Peel paper liner off front side of foam design to expose adhesive.
3. Place flock (color side facedown) onto the exposed adhesive and run through a manual die-cutting machine to apply pressure.
4. Peel away flock sheet from foam design.
5. Remove remaining liner and apply flocked design to project.

Tip: For intricate designs, adhere one side of foam to cardstock for added support prior to cutting.
