

Foil-Mates™

Directions: For best results, always pre-test.

Laminator settings may vary based on brands/models, temperature and speed settings.

1. Trim **Foil-Mates™** backgrounds to desired size or cut sentiments or invitations using Gina K. Designs for Therm O Web Die Sets.
2. Cut a piece of Fancy Foil™ slightly larger than design and position foil, color side up, on top of **Foil-Mates™** design. Place inside folded parchment paper (enclosed). NOTE: When foiling sentiments or invitations, place a scrap piece of cardstock underneath for support.
3. Turn on laminator, select 5mil setting, (check owner's manual for equivalent setting) and allow 10 minutes to warm up. When ready, insert folded parchment with **Foil-Mates™** design into laminator using crease as lead edge.
4. Remove project from parchment paper and peel Fancy Foil™ sheet away to reveal foiled design.

Tips: For best results, before foiling, gently wipe **Foil-Mates™** with a lint-free cloth.

When using Gina K. Designs stitched die sets, the following are recommended for best fit:

Birthday Essentials: Ovals, Rectangles

True Friend: Circles, Ovals, Squares

Wedding & Anniversary: Circles, Ovals, Rectangles, Squares

You're Invited: Circles, Squares

Save the Date: Ovals, Rectangles

Wedding Invites: Ovals, Rectangles

The following hot laminators have been tested for use with Gina K. Designs for Therm O Web Foil-Mates™ and Deco Foil™ Toner Sheets
