## Transfer Gel **DUO**

NEW  
FORMULA

Transfer without heat? No need for a laminator?

You read that correctly, it IS possible to transfer foil or flock without the use of a laminator! Introducing NEW Transfer Gel **DUO**! In response to customer demand, Deco Foil® has reformulated the transfer gel to work with or without heat. The **DUO** works two ways; you can transfer using heat from a laminator OR pressure from a die-cutting machine. Transfer Gel **DUO** is a permanent transfer medium that dries clear and remains tacky for easy use.

- 4 oz jar
- Permanent
- Dries Clear
- Stays Tacky
- Use with Deco Foil Transfer Foils and Flock Sheets
- Compatible with most stencils
